Russian helicopters.

The civil helicopter Ka-32 and its ship-board version the Ka-32S are the latest and the most impressive representatives of the Kamov school of helicopter design.

One is a land-based utility machine with minimum equipment, and the other is equipped with radar and extensive avionics. Despite its compact size, the maximum weight of the Ka-32 is no less than 12,600 kg. Each of its two engines has a take-off power of 2,205 HP (лошадиная сила). The rotor blades have lifting aerofoils and are all-composite.

The standard of electrical equipment and avionics is intended for extreme reliability. The main instrument panel of these helicopters contains an electro-mechanical flight director.

The Ka-32 helicopters set new standards in helicopter design and manufacture.

Words:

Ship-board- палубного базирования;

Representatives- представители (примеры);

Land-based utility- общего назначения;

Take-off- взлет;

Avionics- бортовое радиоэлектронное оборудование;

Text

Pilots fly airplanes. They are airmen. Pilots are members of the air crew. Pilots must know all about their airplanes and also about flying. Pilots do not prepare airplane for flight, they fly them. The normal flight crew consists of a pilot, co-pilot, two flight engineers, a navigator and a radio operator. Except display, a pilot uses electromechanical instruments. Much of the panel area in front of the pilots is occupied by single function warning and caution lights, which alert the pilots to a problem.

Flying is an interesting and difficult job.

My job is to maintain, overhaul and repair big widebody airplanes. It takes a lot of time to prepare an airplane for flight. Modern aircraft and aeroengines are made in modular form. Modular construction facilitates the rapid replacement of worn assemblies.

Aircraft technicians, mechanics and other specialists are the people who prepare airplanes for flight. These people are members of the ground crew. They test, maintain and prepare aircraft systems. The primary duty of an aircraft maintenance engineer, his technicians and mechanics is to keep their airplane always trimmed and ready for flight. The maintenance engineer must know everything about his aircraft. He tells his technicians and mechanics what to do in each problem. The ground crew usually work at the aircraft parking place and do only minor repairs. Engine overhauls and major repairs are done in the hangars. Aircraft maintenance is an interesting and difficult job.
