Выполните перевод текста.

In the 20th century, humankind touched the sky, literally. The credit is given to the Wright brothers who made the first flying airplane in 1903. Now, this is a confusing topic in other parts of the world, such as Brazil. The reason behind this is that even though the Wright brothers initially invented the airplane, a lot of other scientists from other parts of the world contributed to the improvement of the aviation industry. One such example is Alberto Santos-Dumont who was a Brazilian expert. He was the first to build a heavier-than-air aircraft in the European countries, although this was an unsuccessful invention.

As for the works of the Wright brothers, they did lay roots of the craft that has made it a piece of cake to travel to the other side of the world. The mere invention of airplanes contributed to the increased rates of trade, tourism, and lots of other good things. You may also blame this invention for wars and chaos, but overall, it won't be wrong to say that the entire future of this world has been altered with this miraculous creation.

### Задание №4 (10 минут)

Переведите текст и подготовьте пересказ:

Aleksandr Fyodorovich Mozhaysky, (born March 9, 1825, Rochensalm, Russia [now Kotka, Fin.]—died March 20, 1890, St. Petersburg), Russian naval officer and early experimenter with winged flying machines.

Having conducted his own studies of aerodynamic phenomena, Mozhaysky constructed a series of flying models and kites. One account suggests that he designed a glider and was towed into the air by horses. His plans for a full-scale powered flying machine were studied and approved by a government commission that included the great Russian chemist Dmitry Ivanovich Mendeleyev. Mozhaysky's aircraft apparently made a short hop into the air following a run down a launch ramp in 1884. The French pioneer Felix du Temple had made the first powered hop under similar circumstances as early as 1857–58.

Mozhaysky's aeronautical experiments were almost completely unknown until rediscovered by Soviet propagandists, who falsely portrayed him as the inventor of the airplane.
