Перечень теоретических заданий:

Задание №1

Переведите текст.

In the 20th century, humankind touched the sky, literally. The credit is given to the Wright brothers who made the first flying [airplane](#) in 1903. Now, this is a confusing topic in other parts of the world, such as Brazi. The reason behind this is that even though the Wright brothers initially invented the airplane, a lot of other scientists from other parts of the world contributed to the improvement of the aviation industry. One such example is Alberto Santos-Dumont who was a Brazilian expert. He was the first to build a heavier-than-air aircraft in the European countries, although this was an unsuccessful invention.

As for the works of the Wright brothers, they did lay roots of the craft that has made it a piece of cake to travel to the other side of the world. The mere invention of airplanes contributed to the increased rates of trade, tourism, and lots of other good things. You may also blame this invention for wars and chaos, but overall, it won't be wrong to say that the entire future of this world has been altered with this miraculous creation.

Baikal has much water, its volume of water is more than the volume of the Baltic Sea. The water of Baikal is cold. It is colder than water of many other Siberian lakes. The scenery around its shores is as beautiful as that of the Caucasus. The climate here is colder than the climate of the Caucasus.

Do you know that more than 300(three hundred) rivers flow into this lake and only one river, the Angara, flows out? This river carries a tremendous volume of water, it is very powerful and deep, and has a very strong current, much stronger than the current of the Volga. That is why the Angara freezes later than lake Baikal.
