The profession of a maintenance technician

Engineering is one of the most ancient occupations in history. Engineering is concerned with creating devices, structures and systems to satisfy some human requirements and designing is central to this activity. Without the skills included in the broad field of engineering our present-day civilization never

could have evolved. I made up my mind to become a flight engineer that is why I decided to enter the Aircraft Faculty.

The flight engineers (aircraft maintenance mechanics) are members of flight crew. They prepare the aircraft for flight. They must know lots of specific characteristics of different types of aircraft. All mechanical and electrical devices aboard planes, must work properly. Their duties are: routine servicing, maintenance of aircraft, determination and repair of faults, maintaining or overhauling aircraft and components.

Форма контроля: Контрольная работа (Опрос)

Описательная часть: Письменная контрольная работа.

Задание №1 (10 минут)

Прочитайте диалог "На практике":

_Today I am going to show you how airplanes are prepared for flight and what ground personnel is doing.

_My brother is a civil aviation pilot. He sometimes tells us about accidents. Is it really dangerous to fly a modern jet liner?

_It is no more dangerous than walking in the street. But the airplane must be very thoroughly prepared by the ground crew.

_What are these people?

_They are aircraft maintenance technicians, mechanics and other aviation specialists who maintain the major parts, systems and controls of an aircraft.

_Does this personnel actually repair the plane?

_The ground crew usually do only minor repairs. Their main duty is to keep the plane trimmed and ready for flight.

_But who does major repairs?

_Major repairs and overhauls are done by technicians and engineers in the overhaul hangar.
